

CATERSAVE® Patented AUTOMATIC CUTLERY POLISHERS

Eliminates Manual Labour Costs & Reduces Energy Bills

Manually polishing cutlery is very Labour-Intensive & Expensive

(If you're using the older Manual-Feed Cutlery Polisher - also see overleaf.)

Our new patented CaterSave Automatic Cutlery Polishers now make the washing and polishing of cutlery into an integrated seamless operation
- Tray of washed cutlery is now placed directly from dishwasher into polisher.

SAVE€

- Labour - Time
- Energy - Money

Some Of The Benefits:

Huge Labour Savings

- Eliminates the need for hiring staff to polish cutlery.
- Dishwasher Operator is now efficiently employed for both washing & polishing cutlery.
- Our high quality Polishing Granulate only requires changing every 3 months.

Reduces Energy Costs

- Heats Chamber and Granulate in approximately 3 minutes.
- Speeds-up cutlery turnaround as polishing cycle is less than 3 minutes.

Raises Hygiene Standards (HACCP)

- Leaves cutlery free from bacteria.
- Eliminates the need for unhygienic drying cloths.

Avail of our complete Catersave System now...

Cost per day, from only:

€4.95*

*(Excludes VAT. Terms and Conditions apply)

- This is the equivalent cost of just 30 mins labour.

CATERSAVE® PATENTED AUTOMATIC CUTLERY POLISHERS

The Next Generation in Cutlery Polishers

If you're using the older Manual-Feed Cutlery Polisher, you can now upgrade to one of our state-of-the-art CaterSave Automatic Labour-Free Cutlery Polishers

(If you're currently polishing cutlery by hand, please see overleaf.)

CaterSave Automatic Cutlery Polishers Supersede All Other Models:

Seamless Integrated System – Tray of Cutlery put directly from washer into polisher.

Reduces Energy - Heats the chamber and granulate in approximately 3 minutes, as opposed to up to an hour for manual-feed models.

More Silent Operation - No strong vibrating noise & loud rattling of cutlery.

Eliminates Damage To Cutlery - Polished & retained internally – no dropping from exit into collection tray.

Ends Damage to Drum – Cutlery can damage coating on other models.

Less Risk of Breakdown – No vibrating motor – less moving parts.

Robust – New innovative technology and design.

CaterSave® Hygienic Glass Polishing Systems

* **Fast**

* **Simple**

* **Hygienic**

Essential for High Standards in Bars, Restaurants, Hotels, etc.

Easy to Use and Fast Operation - polishes two glasses at a time.

Cuts labour costs by up to 80% - allows staff to work more productively.

Eliminates the use of Polishing Cloths - very unhygienic.

Gives you a sparkling clean finish - each time, every time.

Hot Dual-Airflow gives you a faster, quality shine - sparkling glassware.

The only Glass Polishing System which has a unique patented design that is fitted with an Air Filter & UV Lamp - ensures that hot air is cleaned and sanitized.

Helps avoid glass breakages and the risk of injury to staff - health and safety.
